

Support Maddox to make his *Recovery a Reality!*

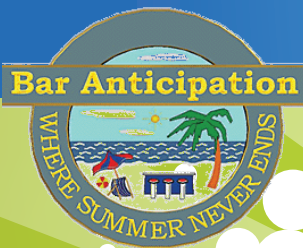

Please join us at a very special benefit for
Maddox Ty Flores

4 year old Maddox has cerebral palsy, which causes him to struggle in every area of development. This condition requires intense therapy in order to receive improvement and we believe in Maddox's potential to gain more independence.

The Anat Baniel Method for special needs children has achieved amazing, quick, and permanent results and recognized within the medical community. Please join us and help Maddox and his family raise enough money to continue this amazing therapy breakthrough and make his *Recovery a Reality!*

Saturday, April 17th • 2-6pm • Bar Anticipation • 703 16th Avenue,

Cash Bar • 50/50 • Happy Hour Drink Prices • Italian Buffet • Gift Auction
Live local Reggae Band... RandomTest

"Anat Baniel's work deserves to have the greatest possible audience, both in the rehabilitation medicine community and beyond. I believe that it is one of the most important approaches to physical rehabilitation, especially when conventional physical therapy is insufficient."

*Daniel Graupe, Professor of Bioengineering and
Adjunct Professor of Neurology and Rehabilitation Medicine
at the University of Illinois, Chicago.*
